1. The plant of the Vihorlat National Enterprise in eastern Slovakia, construction of which is not yet completed, is situated on the northeastern outskirts of the town of Snina (N48-59, E22-09), along the northern side of the railroad line. The area covered by this plant is approximately 1,000 x 300 meters, the longer side stretching along the railroad line in an east-westerly direction.
2. Construction of the plant was started in 1949, but several buildings are still unfinished. The reason for the slow progress is believed to be lack of money.
3. The factory is equipped with new machinery, mostly lathes and milling machines. The plant is believed to manufacture machines and machine parts, but their type, quantity, and destination is not known.
4. The number of workers at the plant is estimated at 1,500, including construction labor. Workers employed in the plant are mostly young people who have been trained in the Adamov Machine Works (Adamovske strojirny) in Adamov (N49-19, E16-40) and in the V.I. Lenin Works in Pilsen. The plant has its own hostel for employees in Snina.
